EDUCATION

Abdullah Gul University

Bachelor of Science in Computer Engineering; GPA: 3.45/4.00 (Honors)

Kayseri, Turkey

Sep. 2019 – Jun. 2024

EXPERIENCE

Software Engineer

Nextarp (Remote)

Jun. 2024 – Present

Netherlands

- Architected and deployed full-stack web and mobile applications using Spring Boot, React, and React Native, serving production traffic for training management and ERP systems
- Engineered backend microservices with Spring Boot integrating MySQL, Redis caching, and Stripe payment processing, improving response times by implementing efficient data access patterns
- Built an agentic development lifecycle (ADLC) system of automated bots that manage code review, testing, and a multi-stage security gate covering static analysis (SAST), secrets scanning, and dependency vulnerability checks (SCA), authenticating into GCP without stored keys via Workload Identity Federation
- Established CI/CD pipelines using Docker and GitHub Actions, automating zero-downtime deployments to GCP and Azure, and managed distribution through Microsoft Partner Center
- Extended ERPNext/Frappe framework functionality through custom modules and REST API integrations
- Developed Microsoft Word add-ins on .NET, quickly onboarding onto an unfamiliar stack to meet project needs

Web Developer (Part-Time) / Web Developer Intern

Mazaka Yazilim

Jul. 2022 – Dec. 2023

Kayseri, Turkey

- Developed responsive React-based user interfaces and modernized legacy codebases to improve maintainability, collaborating with cross-functional teams to deliver client-aligned features
- Built a full-stack authentication system using React, Node.js, and JWT, implementing secure login workflows

PROJECTS

Kayseri Social Run | *Next.js, Postgres, Better Auth, Resend, Vercel* | kayserisocialrun.com

- Founded and built a community running club webapp from the ground up for a local Kayseri youth-led running community, including a public marketing site, authentication, and transactional email flows
- Designed and shipped the full product independently: architecture, database schema, auth, and deployment

Machine Learning Research | *TensorFlow, Scikit-learn, TPU*

Jun. 2023 – Present

- Competed in Kaggle ML competitions focusing on regression and computer vision tasks
- Designed data preprocessing pipelines and trained neural networks leveraging TPU acceleration for improved performance

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, C#, Dart, SQL

Backend & APIs: Spring Boot, .NET, Node.js, Express.js, RESTful APIs, JWT Authentication

Frontend: React.js, Next.js, HTML/CSS, Bootstrap, Ant Design, Blazor WebAssembly

Mobile Development: React Native, Flutter

Machine Learning: TensorFlow, Scikit-learn, Computer Vision, Regression Models

DevOps, Cloud & Security: Docker, Linux, GitHub Actions, CI/CD, Agentic Dev Pipelines (ADLC), SAST, SCA, Secrets Scanning, Google Cloud Platform, Azure, Microsoft Partner Center

Tools & Platforms: Git/GitHub, ERPNext/Frappe, Postman, Figma, MySQL, PostgreSQL, Redis, Stripe API

LEADERSHIP & SERVICE

Head of Event Management

AGU International Association Club

Sep. 2019 – May 2023

Abdullah Gul University

- Led a team to coordinate campus-wide cultural and social events for the international student community

Orientation Program Coordinator (Volunteer)

AGU International Office

Sep. 2020 – Jun. 2024

Abdullah Gul University

- Organized onboarding programs for incoming international students, facilitating their integration into university life
